DETAILED ACTION

Allowable Subject Matter

1. Claims 1-18 are allowed.

Regarding independent claims 1 and 10, it is allowed because there is no prior art that completely encompasses all the limitations of the claim. The closest prior found is Bhogal et al. discloses a localized voice mail system, which downloads voicemails to a remote server/personal computer for access of user's cellular phone. However, Bhogal does not completely discloses all of the limitation, such as

where at least one message has been deleted by the subscriber using the external device on the external device (which is connected to the wireless communication device), and deleting any corresponding messages from the server. Bhogal discloses downloading the messages to the external device and then deleting the messages at the external device but doing so does not delete corresponding messages from the server. Another limitation that Bhogal does not disclose is

where at least one message has been modified by the subscriber on the external device, uploading any modified messages to the server. There is no disclosure of editing the messages and then uploading it to the server.

Similarly Freadman discloses some of the limitations of claims 1 and 10, but does not disclose the missing features stated above. Instead Freadman concentrates

on uploading the messages from the external device to the cellular phone's memory and transmitting the voicemail messages from the server to the cellular phone.

It is concluded that no prior analogous art can fully disclose all the limitations of independent claims 1 and 10; therefore all claims 1-18 are allowed.
